

PROCESS WORK

- setSize 400x400

- Check to see MouseButton

- Try if-else statement for background color change

- Try clear background set and green background set

- Code works, set background to red shade as placeholder until color gradient is set (242, 17, 85)

- ISMouseDown doesn't work, color doesn't loop between 3 set colors, try different "IS" input

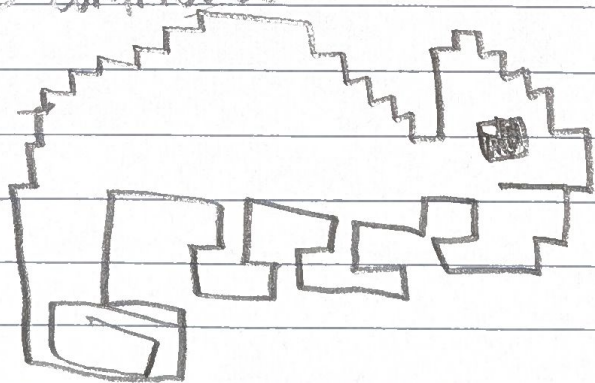

- Code became corrupt, start again :)

- ASK Prof. how to create color changing background based on mouse input and loops

- Draw Chameleon

- Input all draw line coordinates

- Draw lines completed

- Fill color for eye and fill body with color gradient

- Change of Plan, use KeyboardKey W, A, D to alter background color

- Press down to hold color, simpler code

- Set background default to white color

- Set background alters red, blue, green

Hilroy

- Find out how to alter gradient size to include blue, red, green
- set line opacity to completely fade body draw lines if possible
- Redraw Chameleon using shapes instead of lines to fill
- Keep gradient Value 0, Change Pre-set background colors
